Platned

For those who do not want to move away

from their existing system all at once, our flexible Acumatica edition allows manufacturers to integrate various components with their current vendor solutions, ensuring a smooth transition and continuity without an immediate shift.

Acumatica Discrete Manufacturing ERP software is designed for manufacturers, whether your Bill of Material (BOM) includes solid materials formed or assembled into finished goods. Our Manufacturing Edition supports all aspects of production, estimating, engineering, material planning, scheduling, product configuration, and data collection for discrete manufacturers, such as industrial or equipment producers.

Choose Platned for your Acumatica ERP needs and experience the difference that expert knowledge, dedicated support, and a customer-focused approach can make.
