

# Driving seamless digital transformation : Platned and Boomi partnership

At Platned, we understand the challenges businesses face when managing complex IT ecosystems, integrating disparate systems, and ensuring seamless data flow across operations. That's why we have partnered with Boomi, a leader in intelligent integration and automation, to help our customers accelerate digital transformation and achieve operational excellence.

## A powerful partnership for integration and efficiency

Boomi's AtomSphere Platform provides a unified, cloud-native integration solution that enables businesses to connect applications, data, and people. By leveraging Boomi's intelligent automation, Platned enhances our service offerings, providing customers with a streamlined approach to modernising their IT landscapes, particularly in IFS Cloud™ migration and Field Service Management (FSM) solutions.

## Key benefits of the Platned-Boomi collaboration

Platned follows a structured methodology, Platned Pathway™, to ensure successful implementations and re-implementations of IFS solutions. This approach provides clear visibility into project timelines, deliverables, and milestones, enabling businesses to stay on track and achieve their desired outcomes efficiently. The methodology consists of five key phases :

- Faster migration timelines with reduced complexity.
- Real-time data synchronisation between legacy systems and IFS Cloud™.
- A future-proof, scalable architecture supporting ongoing innovation.

## Enhanced field service management (FSM) integration

For utilities and service-based industries, FSM software is critical to operational efficiency. Platned's FSM solutions, powered by IFS, gain enhanced capabilities with Boomi's integration platform :

- **Real-time data flow** : ensures accurate, timely data exchange between FSM, ERP, and customer systems.
- **Predictive maintenance** : integrates IoT and machine data for proactive asset management.
- **Mobile workforce enablement** : supports seamless connectivity between field technicians, scheduling tools, and backend systems.

## Intelligent automation & connectivity

Boomi's platform extends Platned's ability to modernise IT infrastructures through :

- **Low-code development** : simplifies integration with a drag-and-drop interface, reducing implementation time.
- **Hybrid IT support** : connects cloud, on-premise, and edge computing environments seamlessly.
- **Accelerated time-to-value** : Boomi's integration efficiency reduces development time by up to 65%, enabling businesses to scale rapidly.

## Why Platned and Boomi ?

The synergy between Platned's industry expertise and Boomi's leading integration capabilities means customers benefit from :

- **A holistic digital transformation strategy** tailored to business needs.
- **Enhanced agility** to adapt to market changes and operational demands.
- **Improved customer experiences** through connected, data-driven decision-making.

As Platned continues to support businesses in their digital transformation journeys, our partnership with Boomi reinforces our commitment to delivering robust, future-ready solutions. Whether you're migrating to IFS Cloud™, enhancing FSM capabilities, or optimising enterprise integrations, Platned and Boomi together provide the tools to drive efficiency, scalability, and success.

**Unlock the power of seamless integration with Platned and Boomi.** Contact us today to learn how we can accelerate your digital transformation journey.
