

Finance in IFS Cloud™

Smarter finance starts here

Gain real-time control, automation, and AI-driven insights with IFS Cloud, delivered by Platned.

Finance teams today are expected to do more than manage transactions. They are trusted advisors who need to provide real-time insights that drive smarter, data-led decisions. Traditional reporting and manual processes are no longer enough. Businesses require intelligent, automated tools to streamline operations, ensure compliance with global tax regulations, and keep pace with evolving financial standards.

With Platned, IFS Cloud Finance provides a complete, AI-powered solution covering core functions including accounts receivable, accounts payable, general ledger, fixed assets, and financial close. It also supports planning, forecasting, and group-level consolidation. Integrated analytics and automation give visibility across procurement, supply chain, projects, and manufacturing, enabling finance teams to make predictive decisions that improve efficiency and drive growth.

Spend Analyses and reporting

Benefits

Drive efficiency with connected data

Unify financial data across systems and reduce errors with IFS.ai automation.

Gain complete financial control

Get full visibility into projects, assets, and financial processes with AI-powered insights that optimise margins, revenue, and costs.

Save time and resources

Automate invoicing, payments, and period close, freeing finance teams to focus on higher-value work.

Make smarter decisions

Access real-time reports and predictive analytics to improve business performance.

General Ledger Dashboard

Key capabilities

Accounting rules

Automate transaction rules with AI-driven accuracy, minimising errors and ensuring compliance.

Multi-company master data control

Centralise and automate management of accounting rules, tax definitions, and structures across multiple entities.

General ledger and parallel accounting

Manage multi-company, multi-currency, and multi-dimensional accounting with AI enhancements that improve queries, revaluation, and reporting.

Fixed asset control

Automate the full asset lifecycle from acquisition to disposal, including depreciation and lease accounting.

Accounts payable and receivable

Streamline AP and AR with automated invoice matching, reconciliation, and payment processing.

E-invoicing

Optimise invoice management with AI, reducing manual entry and ensuring compliance with electronic invoicing regulations.

Financial project forecasting

Track and forecast project-based finances in real time, improving revenue recognition and budget control.

Cash planning

Use AI-driven forecasting to simulate scenarios, optimise liquidity, and improve enterprise-wide planning.

Consolidation

Automate consolidation and intercompany eliminations for faster, more accurate financial close.

Financial reporting and analysis

Generate intelligent reports with real-time insights, supported by seamless integration with Excel and Power BI.

Cash Planning Multi Company

Why Platned

As an IFS Gold Services Partner, Platned helps you get the most from IFS Cloud Finance. From implementation to optimisation, we ensure your finance teams benefit from automation, compliance, and actionable insights that unlock sustainable growth.
