

IFS Cloud™ – Artificial Intelligence (AI) with Platned

Overview

IFS Cloud embeds Artificial Intelligence (AI) and Machine Learning (ML) across the entire enterprise platform. With Platned, this is not a separate add-on but a core part of Finance, Manufacturing, Services, Asset Management, Supply Chain, and Projects. AI enables smarter decisions, predictive insight, and automation that drive efficiency, agility, and sustainable growth.

Key features

- **Predictive maintenance** – anticipate equipment failures, reduce downtime, and extend asset life.
- **AI-powered scheduling** – allocate resources intelligently for field service, construction, and complex project planning.
- **Demand forecasting** – improve accuracy across inventory, production, and supply chains with embedded machine learning.
- **Anomaly detection** – monitor transactions, costs, and KPIs to flag risks before they escalate.
- **Natural language assistants** – access information, workflows, and insights quickly through conversational AI.
- **ESG and compliance insights** – capture and analyse data to support sustainability targets and reporting standards.
- **Embedded analytics** – AI-driven dashboards that highlight trends, risks, and opportunities in real time.

Benefits with Platned and IFS Cloud

- Reduce operational costs by automating manual tasks and identifying inefficiencies.
- Increase asset uptime with predictive maintenance and proactive issue resolution.
- Improve customer satisfaction through intelligent scheduling, faster response, and proactive communication.
- Enhance decision-making with predictive insights and anomaly detection in finance and operations.
- Support sustainable growth with AI-driven ESG and compliance reporting.
- Boost productivity by empowering employees with AI assistants and smarter workflows.

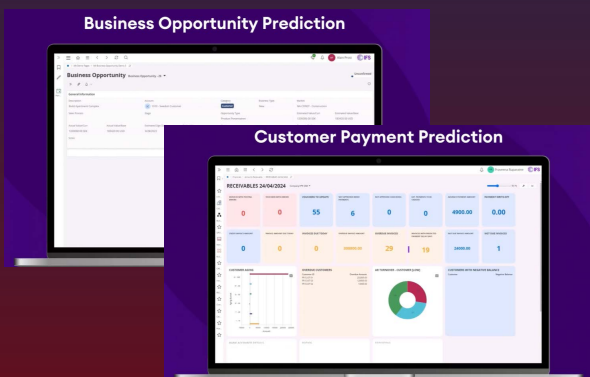

Why Platned?

IFS is recognised for embedding AI directly into its platform, combining ERP, EAM, FSM, and Project Management in one solution. Platned ensures you get the full value of these innovations.

As an IFS Gold Services Partner, Platned helps you adopt AI in a practical, results-driven way. Whether it is predictive maintenance, automated invoicing, intelligent scheduling, or finance automation with **ParsaAI**, our expertise ensures that AI aligns with your business goals. We focus on measurable outcomes such as reduced downtime, improved cash flow, and competitive advantage.

Selected AI customers

- **Creo Medical** – UK medical device manufacturer using IFS and AI for innovation, compliance, and predictive quality.
- **Copper Resources Australia** – mining services provider applying IFS AI for predictive maintenance and asset performance analytics.
