

# IFS Cloud with Platned

Industry. Innovation. Choice.

# Your moment of service, powered by Platned

At Platned, we deliver IFS Cloud to help you achieve your Moment of Service™ - the point where people, assets, and processes come together to create value for your customers. We know that product features and pricing alone are no longer enough to stand out. What matters is customer loyalty, repeat business, and creating delighted customers. That's why we focus on delivering IFS Cloud in a way that transforms how you serve your markets.

## Why Platned for IFS Cloud:

- A global IFS Gold Partner with decades of experience
- Proven expertise across asset-intensive industries
- End-to-end services from consulting to managed support
- Local presence backed by 24/7 global delivery

# One platform, complete capability

IFS Cloud is a single platform that brings together ERP, EAM, and FSM, with built-in AI to drive smarter decisions. Platned helps you deploy, configure, and extend these capabilities to fit your exact needs.

## With Platned and IFS Cloud, you can:

- **Unify operations** – Finance, HR, CRM, supply chain, manufacturing, projects, and service
- **Optimise asset performance** – full lifecycle asset management, predictive maintenance, and Industry 4.0 readiness
- **Transform service delivery** – advanced scheduling, mobility, and real-time optimisation to boost first-time-fix rates
- **Deploy flexibly** – choose IFS-hosted cloud or run remotely in your own data centre, with the option to switch as regulations evolve

Platned ensures each deployment is tailored to your industry and designed to scale as your business grows.

# Industry focus with built-in innovation

At Platned, we understand that every industry faces unique challenges. That's why we deliver IFS Cloud with industry accelerators, dashboards, and role-based lobbies that get you up and running faster.

## Industries we support with IFS Cloud

- Aerospace & defence
- Energy, utilities & resources
- Manufacturing
- Construction & engineering
- Service industries
- Telecommunications

## Embedded innovation with IFS Cloud and Platned

- **IFS.ai Copilot** – everyday AI to support faster, smarter decisions
- **Automation** – pre-built workflows to streamline approvals and processes
- **IoT and machine learning** – connect assets for real-time insights and predictive maintenance
- **Remote Assistance** – augmented reality tools for faster, lower-cost support
- **Sustainability** – tools to reduce emissions, adopt circular models, and meet regulatory requirements

# Trusted expertise and recognition

Choosing IFS Cloud with Platned means you benefit from award-winning software delivered by an experienced partner who understands how to unlock value.

## Recognition for IFS Cloud

- **2025 Gartner® Peer Insights Customers' Choice** for Enterprise Asset Management
- **2024 Gartner® Peer Insights Customers' Choice** for Cloud ERP
- **IDC MarketScape Leader 2023–24** in Service Lifecycle Management
