

Crystal Reports to IFS Cloud report studio conversion tool

The challenge: Crystal Reports are being discontinued

Did you know that IFS discontinued Crystal Reports and has now announced the end of support for them? With IFS Cloud 25r2, Crystal Reports will no longer be supported. This means every customer still using Crystal (.rpt) reports must migrate them to IFS Report Studio. For many organisations, this creates a major workload that can delay or disrupt upgrade plans.

The impact for IFS customers

Most IFS customers have built up hundreds of custom Crystal Reports over the years. Converting these manually into IFS Report Studio format can take days or even weeks per report. The process is complex, time-consuming, and highly technical- often requiring resources that are already stretched.

The Platned solution

Platned has developed a dedicated Crystal Reports to IFS Cloud Report Studio Conversion Tool to simplify and accelerate this transition. Offered as a managed service, this solution automates much of the conversion process, turning what was once a lengthy manual task into a matter of hours.

Key benefits

- **Fast turnaround** – complete report conversions in hours, not days or weeks.
- **Accurate output** – produces high-quality IFS Report Studio files (.rep) with only minimal manual refinement needed.
- **Service-based delivery** – no software to buy, install, or maintain. Platned manages the entire process for you.
- **Proven success** – successfully deployed for Control Southern in the US, delivering excellent results.

Why choose Platned

As a trusted IFS Gold Services Partner, Platned specialises in helping customers upgrade, optimise, and manage IFS Cloud environments. Our in-depth knowledge of both Crystal Reports and IFS Cloud ensures a smooth, efficient, and compliant conversion - keeping your upgrade on track and your reporting fully functional.

Take the next step

If you are upgrading to IFS Cloud 25r2 or beyond, now is the time to start planning your report migration.

Contact Platned today to learn how our Crystal Reports to IFS Cloud Report Studio Conversion Tool can save you time, reduce risk, and keep your reports working seamlessly in IFS Cloud.
