

# IFS Cloud delivered with Platned expertise

**A single solution. A single delivery partner. Clear, measurable outcomes.**

IFS Cloud unifies **ERP, EAM, FSM and Service Management** within one modern cloud

**Management** within one modern cloud

environment. When delivered and supported by Platned, organisations can move from

implementation to value more quickly, with reduced delivery risk and greater certainty.

## What IFS Cloud delivers

A comprehensive, integrated platform that enables organisations to:

- Manage finance, projects, supply chain, manufacturing, service and assets within one connected system.
- Access real-time operational and financial insight across the business.
- Use industry-aligned capabilities without heavy customization.
- Take advantage of cloud flexibility, frequent innovation and regular product releases.
- Equip teams with mobile access, analytics and decision support tools.

## How Platned supports your success

### A structured delivery framework

All IFS engagements are delivered using Platned Pathway, a proven methodology that provides governance, visibility and control throughout the project lifecycle, while remaining flexible to changing business needs.

### Full lifecycle services

Platned supports organisations from initial planning through to long-term optimisation, covering implementations, upgrades, integrations, testing, release management and managed services.

### Process-led solution design

Configurations are aligned to real financial and operational processes, helping teams adopt the system faster and make better-informed decisions from day one.

## Maximising value from your IFS investment

Platned extends and safeguards IFS Cloud with specialist capabilities, including:

- Platned Mahara for automated testing and release confidence.
- ParsaAI for intelligent invoice matching and finance automation.
- Integration and data platforms to connect applications across the enterprise.
- Advanced analytics and reporting for deeper performance insight.

## Global delivery, regional understanding

With teams across the UK, Nordics, US, Australia and New Zealand, the Middle East and South Asia, Platned combines local knowledge with a coordinated global delivery model. This ensures consistent service quality, access to specialist expertise and scalable support as organisations evolve.

## The business impact of working together

By combining IFS Cloud with Platned's delivery and support expertise, organisations can:

- Gain complete visibility across finance, projects and operations.
- Lower risk during implementations, upgrades and major transformation programmes.
- Increase efficiency, system reliability and user adoption.
- Realise value from new capabilities more quickly.
- Establish a secure and scalable platform for long-term growth.
