IFS Expressway for Construction and Engineering

A simpler, faster route to IFS Cloud.

A structured, industry-focused approach that helps you take control of projects, costs and operations, and realise value sooner.

What it is

A construction and engineering implementation solution for IFS Cloud.

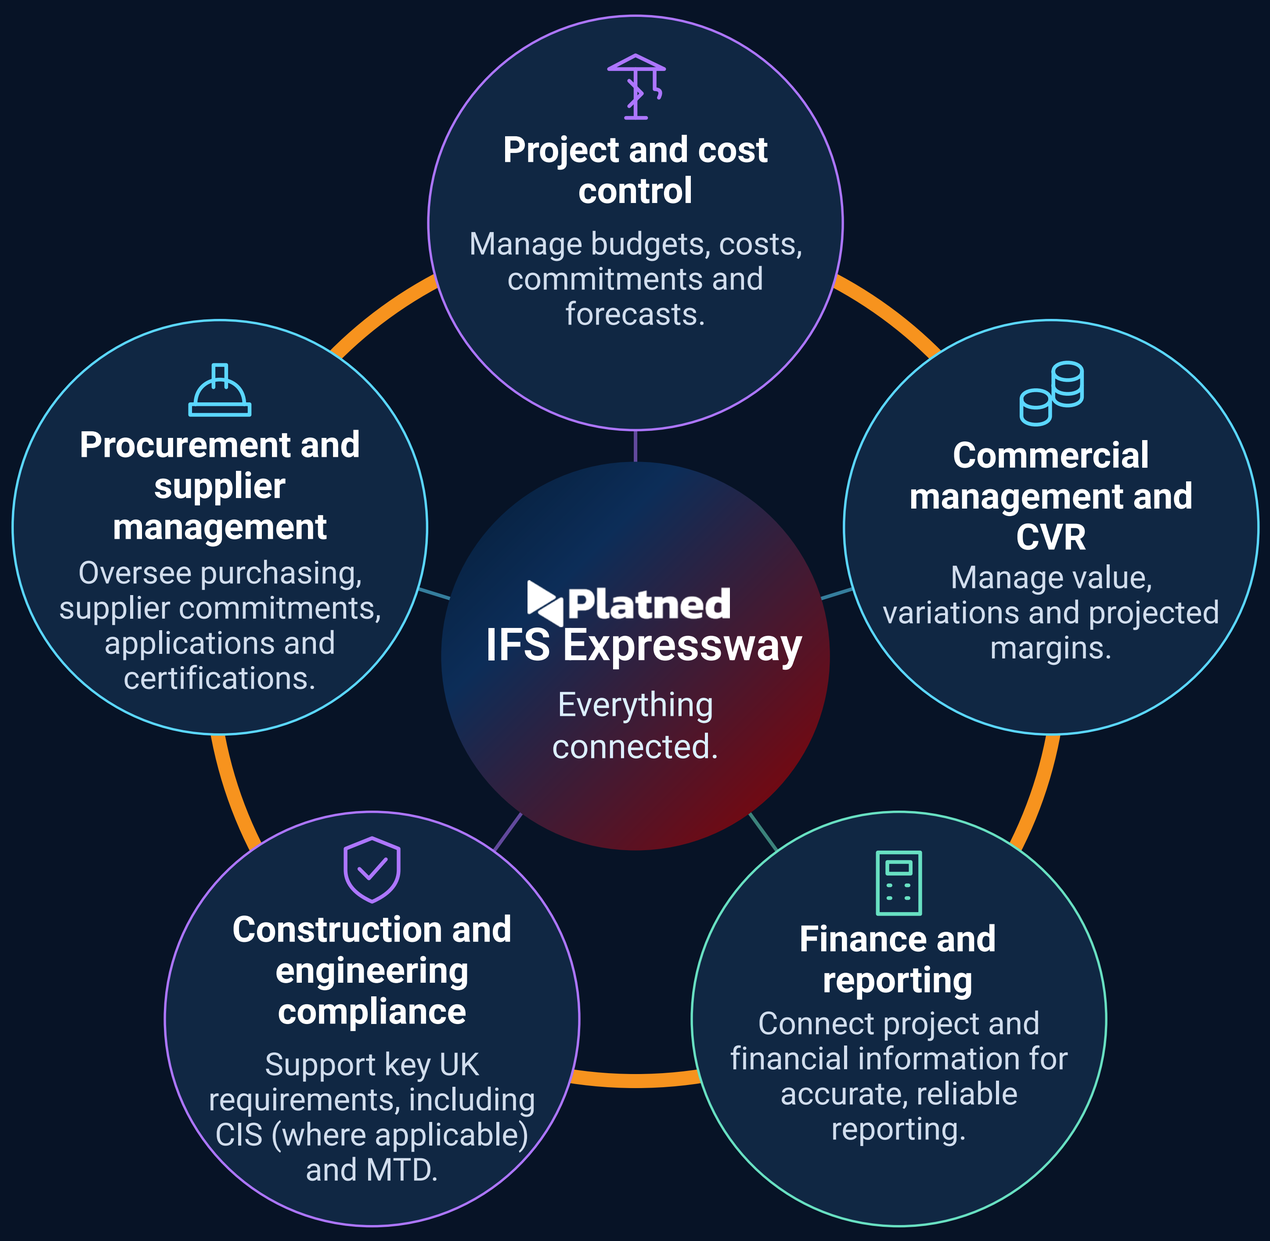

Why it matters

Reduces ERP complexity, helps you go live sooner and focuses on the capabilities your business needs most.

The value

Greater project visibility, stronger commercial and financial control, and a scalable platform for future growth.

Key capabilities for your business

The benefits at a glance

Faster time to value

Get the core capabilities you need, sooner.

Reduced complexity

Predefined processes and a structured approach avoid unnecessary customisation.

Greater delivery confidence

A clear scope and proven framework help keep implementation on track.

Better business control

Connect projects, commercial, procurement and finance for a single view of performance.

Built for growth

Start with what matters today and extend your IFS Cloud capabilities as your business evolves.

Built for construction and engineering businesses

A practical, scalable foundation to improve control today and support future ambitions.

Get control. Gain clarity. Grow with confidence.
